

ONDA

Description

Onda is a range of compact Saeco capsule machines. Modern design featuring a robust metal lever. The grill is adjustable to two different height positions, to suit cups or mugs.

It is also very versatile: the Allcap brewing unit is modular and can be adapted to the different types of capsule widely available on the market (specify capsule format when ordering).

Onda is available in 2 versions: Standard, with manual lever and start & stop button, and Dosata, also with a manual lever but with an automatic coffee dosing system.

Then, by joining Onda to Milky, which quickly prepares hot or cold frothed milk or simply heats milk, the offer can be completed with creamy fresh milk drinks. The jug has a capacity of 150ml and is easily removable and washable.

Main features

- Compatible with various types of capsule (Espresso Point®* or Nespresso®*)
- Automatic coffee dosing (Dosata version)
- Height-adjustable grid in 2 positions (coffee cups or mugs)
- Metal lever

TECHNICAL DATA

Onda
